1. Which one of the following best describes how one can have a scene that is in the grass and suddenly the scene is now in the desert? 1 / 1 point

- Move the camera instantly to a camera marker in another part of the scene.
- Create a new Paint property named desert that has the paint value desert.
- Change the paint value of the ground to desert.
- Change the opacity of the ground to 0 and then back to 1.

Correct

2. In changing scenes between one of four scenes, which one of the following best describes how to get one particular character to appear in every scene? 1 / 1 point

- Move the camera to the new scene and then have the object move and orient to the camera.
- Create a camera marker for each scene and then have the camera and the object both move and orient to the camera marker for the new scene at the same time.
- Create one object marker for the character. When changing scenes, first have that object marker move to the scene and then the object follow to move and orient to the object marker.
- Create an object marker in each scene for the location of the character in that scene, then have the object move and orient to the object marker in that scene when changing to that scene.
